THREE NEW SITES PURCHASE FASTER

NORFOLK, Va. – CCG Systems, Inc. adds three more customers to its roster. The City of Arvada, Colo., County of Cape May, N.J., and Durham Transit, N.C. has purchased CCG’s FASTER fleet management system to replace their existing systems.

When the City of Arvada’s Fleet Maintenance Division was informed by their former vendor that it will stop supporting its fleet management system, they were on the fast track of researching fleet management systems that best fit the needs of their operation. They conclude that FASTER was just that. Aside from maintaining and servicing a fleet size of 600, the division is also responsible for procurement, inventory and maintaining two fuel sites. Considered as one of the most progressive cities in the Denver Metro area, the City of Arvada has an estimated population of 105,000.

Meeting the project’s scope of work, the County of Cape May’s Road Department awarded its RFP contract to CCG Systems, Inc. The department employs 18 mechanics responsible for the maintenance and repair of all county owned light and heavy vehicles totaling 2,000. According the 2006 US Census, the County has an estimated population of 97,724.

The Durham Area Transit Authority (DATA) issued a Purchase Order for the FASTER Fleet Management system. The City of Durham, a current FASTER customer assumed the operation of the local bus system in 1991. DATA contracts for the provision of its fixed route service and paratransit service every five years. And last October 2007, the City Council awarded this contract to Durham City Transit Company Inc. (DCTC). The fixed route system includes 165 employees and 50 buses providing over 13,000 passenger trips daily on 19 different bus routes. The paratransit system includes 43 vans and 57 employees transporting clients to various places within the City of Durham. Known either as the “City of Medicine” or the “Bull City,” the City of Durham has an estimated population of 209,009.
FASTER’s complete, real-time, easily accessible data enhances management staffs’ ability to make proactive decisions to maximize availability, usage, and cost effectiveness of resources. This results in improved customer service, repairs and maintenance services, and increased staff efficiency and productivity. For more information about the FASTER product and services, or to request a demo CD, please contact Allan Richardson (West Coast) and/or M. Lynn Stuart (East Coast) at 1.800.753.2783 or send an email to ccg.marketing.web@ccgsystems.com.

###

ABOUT CCG SYSTEMS, INC. Founded in 1982, CCG Systems, Inc. is the developer of the FASTER fleet management products and services. In 1995, CCG released its client-server version, FASTER CS to replace its first product, BOS FASTER. Its web version, FASTER 3G is currently under development and is expected to be released in 2008. Headquartered in Norfolk, Virginia with regional offices in Wilmington, NC; Denver, CO; Naples, FL; Chapel Hill, TN; Chula Vista, CA; and two offices in the Dallas/Ft. Worth, TX, CCG has over 300 customers in 41 States and Canada with several additional sites in various stages of the implementation process. Known in the industry for the caliber of fleets it attracts and keeps, FASTER end-users have received top accolades in the industry for their benchmarking efforts; efficient and effective cost and budget solutions; community and environmental programs; and excellent customer satisfaction ratings.
